Recommended materials for advertising print

- single-sided: Multisol® D*, 205 g/m²
- double-sided with inner layer: Multisol® D*, 205 g/m²
- PVC banner Opaque B1, 760 g/m² (for double-sided prints)

Ground fittings

- heavy steel bases
- cover of high-quality stainless steel
- weight 14 kg
- stable
- indoor and outdoor use

The heavy steel bases are equipped with a cover of high-quality stainless steel. So they are very stable and well applicable for outdoor use.

Attachment

The crossbars will be attached to the post rings using snap hooks. It enables for a perfect presentation and a quick exchange of the advertising panels.
The Barrier System offers with its slim and ecological appearance all advantages of portable perimeter boards. The simple modular construction is perfect for using it on sports events, trade fairs or as guidance system in public areas.

The system consists of several aluminium poles, which will be joined using plastic connector pieces. The panels are printed according to customers specifications. Using single- or double-sided advertising prints, the Barrier System convinces through its high flexibility.

When creating a barrier with more than one panel, a continuously finished print can be installed without any gaps between the panels.

Barrier Jackets and Fence Scrims

Crowd control barriers are used at many public events to guide visitors and to control large gatherings. Barrier Jackets and Fence Scrims turn the barriers into real eye-catchers. Customised with logos, messages or graphics, they offer efficient advertising space for companies, event organisers or sponsors.

Fence Scrims and Barrier Jackets are available in three different standard sizes. They fit to the most common crowd control barriers and barricades. The graphics get printed on sturdy, durable materials. The eyeleted Barrier Jackets and Fence Scrims can be quickly fixed to fences and barriers using cable ties, bungee ties or cord.
