## Gate Cover

Take double advantage of your alarm devices in entrance areas and at cash points! Secure your goods and use the devices for advertising. This new idea provides great potentials for retailers and suppliers as well.

Gate Covers can be made of variable fabrics printed in digital or chemical screen dye printing. The covers are fitted to the size of the available alarm systems.

Handling is very simple and uncomplicated. Pull the gate covers over the devices – done!

### The advantage:

Sachsen Fahnen's Gate Covers have a distinct advantage towards available variants made from cardboard or plastic.

Textile Gate Covers are insensitive towards mechanical impact such as kicks and pushes. This way, especially in highly frequented entrance areas a much longer lasting advertising effect can be achieved.

## Fitting Room Curtains

The often blank curtains at the front of fitting rooms are a simple but efficient medium for your advertising and promotional message.

We manufacture the curtains according to your supplied artwork and size specifications. They are made of our well-proven flame retardant material Multisol D240 SE.

The curtains are hemmed all-around and supplied with hanging loops at the top edge.

Why not turning your unimpressive curtain into an eye catcher?

Feel free to contact us. We gladly answer your questions and provide more information.
