

Dekoflag L

The material for decorating concepts with transparency or 3D effects

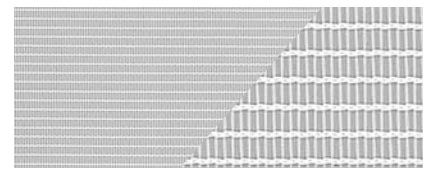

Dekoflag L – for decorating concepts with transparency

Be it in sales rooms, passages or shopping centres – there is always a need for innovative advertising concepts in these highly frequented places. Convey your advertising message with help of the sheer material Dekoflag L for unostentatious and effective sales promotion.

Used as decorative design elements at the POS, Dekoflag L indoor banners perfectly present your advertising message and create a convenient atmosphere at the same time.

Material characteristics:

- sheer knitted polyester with semi gloss
- brilliant colour reproduction
- excellent print through
- grammage 50 g/m² (1.48 oz/yd²)

Fabric Dekoflag L, enlarged to 100% and 300%

3D effect

Add vitality to your advertising! Print your image on an available base fabric as well as on Dekoflag L. Mount the Dekoflag L banner in front of the background banner, keeping a small distance between the two prints. This creates a 3D effect of the image which will definitely catch the eye of your customers.

Also, it is possible to design special 3D looks by using different images on the base fabric and the sheer Dekoflag L. In any case, the result will be an increase of the awareness of your sales activities and the intensification of your advertising effect.
